

Carl,

Attached are three Microsoft Word documents:

Bioass\_12f.doc is the last joint cannery outfall combined effluent bioassay test report.

SKSCHM\_12f.doc is the last StarKist Samoa effluent priority pollutant chemistry test report.

COSCHM\_12f.doc is the last Samoa Packing effluent priority pollutant chemistry test report.

The attached reports do not have the appendices with them (original lab data and CoC forms) which were submitted with the original reports. Each report has a summary table listing the results of all previous tests.

If you can't open any of these please give me a call and I can fax them to you.

All of the tests were done in November of 1998.

Regards,

Steve
